

WATERTEC ENTERPRISES

“Your Water, Our Technology”

Office- J-157, Sector 5, Dr.
Ambedkar Nagar, New Delhi-
110062

Phone: 011- 29968737, 09871151318

Factory- 45, Khandawali Road,
Transport Nagar, Sector - 58, Faridabad-
121004

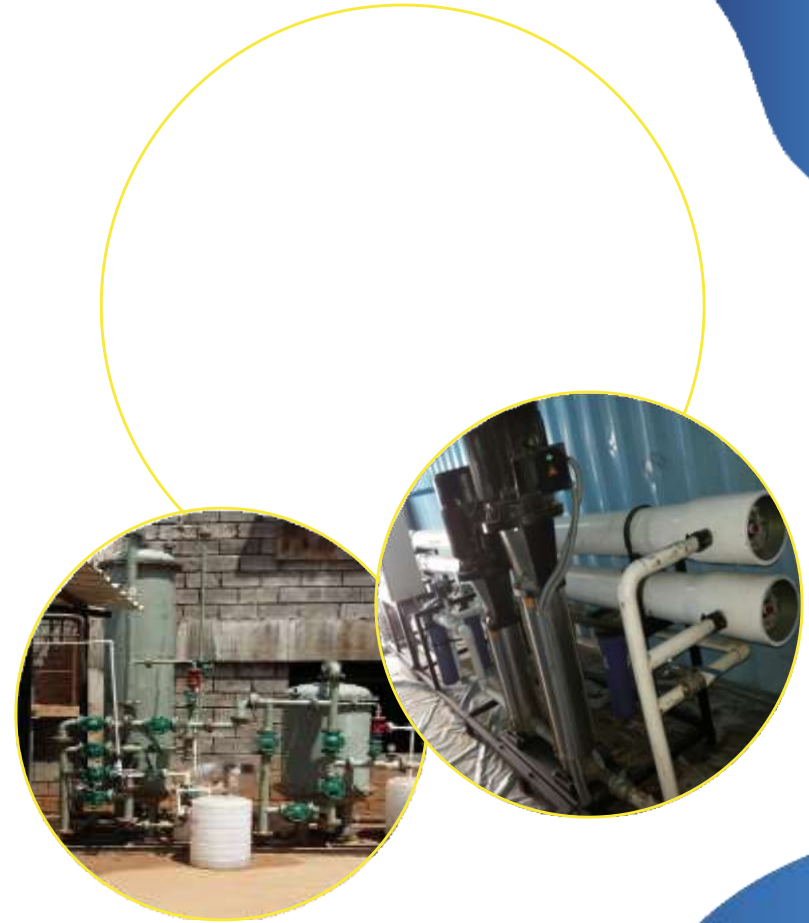

Phone: 0129 - 2988835, 9871151318

ABOUT US

At WATERTEC ENTERPRISES, founded in 2009, our drive for innovation in water technology has been relentless. Our commitment to sustainability and engineering excellence has propelled us to the industry's forefront. Leveraging our extensive experience and technical expertise, we consistently provide our customers with top-quality products at reasonable prices. Through our pan-India sales and service network, we ensure effective after-sales support, swiftly earning recognition and appreciation in the market due to our strong technical prowess and innovative solutions.

CORE PURPOSE

To Protect & Provide uninterrupted energy & health, along with balance the eco system for sustainable living.

CORE VALUES

- (1) Integrity
- (2) Invent
- (3) Client value
- (4) Commitment

Big Hairy Audacious Goal (Bee HAG)

"To become Rs.150 cr. group by 2025 with reputed brand values"

EXCLUSIVE RELATIONSHIP

Both ways at WATERTEC®, whether the relationship with “our customer” or with “our vendors”, we believe in one-to-one relationship. From our years of experience, we have learnt that this is the only way to prosper and grow together. At WATERTEC™ unlike our competitors who try to sale anything and everything, we have differentiated and followed a path of exclusive relationship which brings growth with stability and entire satisfaction of our end costumers. We feel that this is the only way we can create good brand value for our products, business and costumers.

USP :

1. Best product @ Best price

Feature of our company lies with our unmatched capabilities of sourcing high quality products at competitive price, make them available ex-stock or minimum possible delivery period and distribute them to our costumer with best and efficient logistics and product chain management.

2. Customized solution for every need

We understand that different clients have unique water treatment requirement.

3. Cost effective & efficient solution

We offer cost -effective water treatment solutions without compromising on efficiency. Watertec enterprises optimize process to deliver effective results while keeping cost rea- sonable for our clients

4. Reliability & consistency

Watertec enterprises is synonymous with reliability. Client can trust the consistency quality of its water treatment solu- tion ensuring un interrupted solution for process water and drinking water.

PRODUCT CATEGORIES

DM Plants

Demineralization or Deionization is a process of removing mineral salts from water by using the ion exchange method.

Electrodeionization (EDI) Plants

Advantage of EDI:

- Thoughtful stacking design
- Stable water quality
- No need for acid-base regeneration, no hazardous waste liquid discharge
- High water utilization rate
- Continuous operation, simple operation
- Low operating cost
- Small footprint
- Easy to install and maintain
- High water utilization

RO Systems

Reverse Osmosis or RO Systems are used to remove molecules & ions from water.

Seawater Desalination Plants

We offer all three most popular desalination technologies, which are MSF (Multi-Stage Flash), MED (Multi-Effect Distillation) and RO (Reverse Osmosis), and has proven supply records in all these areas.

Sewage Treatment Plant

It is a kind of water treatment and wastewater treatment plant. It is also known as STP.

Ultrafiltration (UF) Plants

These are built with hollow fiber membranes, to purify surface or groundwater from suspended solids, colloids and all kind of micro-organisms.

Waste Water Treatment Plants

We provide a complete solution package tailored to customer's specific wastewater treatment system needs.

Water Softener Plants

We offer water softeners and related equipment for households, laboratories and industrial applications.

Mineral Water Plants

Mineral Water Plant packages are available in unique modules so that they can be upgraded anytime when the demand increases.

Zero Liquid Discharge Plants

ZLD stands for Zero Liquid Discharge, meaning no wastewater is released from industries. It uses advanced treatment tech to recycle and reuse treated wastewater, preventing any discharge into the environment. This involves systems that recycle industrial effluent entirely, turning dissolved compounds into solid residue through concentration and thermal evaporation.

ZLD is applicable for-

- ★ Pulp & Paper industry
- ★ Tanneries
- ★ Pharmaceuticals and Drug industries
- ★ Textile Industries.
- ★ Thermal Power Plants
- ★ Iron & Steel Industry
- ★ Distilleries
- ★ Sugar industries
- Rice Mills, etc..

FEATURE PRODUCT

RO EDI (SECTOR WISE):

Using technologies: (Process water plant/ Drinking water plant)

- ★ RO System RO
- ★ DM
- ★ RO EDI
- ★ Desalination of sea water
- ★ Fluoride / Chloride / Hardness / Iron removing system

Pharmaceutical Industry

Semiconductor & Electronics Manufacturing Industry

Power Generation Industry

Biotechnology

Food & Beverage Industry

Health Care & Dialysis Industry

Laboratories

FEATURE PRODUCT SECTOR WISE: STP WITH UF/MBR

Using technologies:
(West Water Plant)

- ★ ASP: (activated sludge process)
- ★ SBR: Sequential Batch Reactor
- ★ MBBR: Moving bed Bio 1lm reactor
- ★ MBR: membrane Bio Rector
- ★ Electrocoagulation
